Your Safety is Our Commitment

**WE CHANGE THE WAY
YOU FIGHT FIRE**

Introduction

VL Infra Fire & Security System Pvt Ltd is a leading provider of advanced fire safety and security solutions, serving residential, commercial, and industrial clients. We specialize in protecting lives, property, and critical assets with reliable systems built to meet the highest safety standards.

With a strong focus on innovation and customer satisfaction, we offer end-to-end services across a wide range of solutions, including:

- **Fire Alarm Systems**
- **Fire Hydrant Systems**
- **Sprinkler Systems**
- **Gas Suppression Systems**
- **Water Leak Detection Systems**
- **Rodent Repellent Systems**
- **VESDA (Very Early Smoke Detection Apparatus) Systems**
- **CCTV Surveillance**
- **Access Control Systems**
- **Gas Detection Systems**
- **Public Address Systems**
- **24/7 Monitoring Services**

We combine cutting-edge technology with industry best practices to deliver customized, compliant solutions. Backed by a team of experienced professionals, VL Infra ensures reliable, efficient, and effective protection for every project.

At VL Infra, we don't just provide safety systems — we deliver peace of mind.

Fire Alarm Systems

Our intelligent fire alarm systems provide early detection and quick alerts to ensure fast emergency response. Available in conventional and addressable models, they're tailored to fit residential, commercial, and industrial setups. Seamlessly integrates with fire suppression and building management systems. Enhances safety, minimizes risk, and ensures regulatory compliance. Reliable protection when seconds matter most.

Fire Hydrant Systems

Our fire hydrant systems deliver high-pressure water supply to combat large-scale fires effectively. They include pumps, pipes, valves, and hoses built to the latest fire safety standards. Ideal for factories, warehouses, and high-rise buildings with wide coverage needs. Designed for durability, performance, and easy maintenance. A critical component in any comprehensive firefighting setup.

Sprinkler Systems

Automated sprinkler systems activate instantly to control fire at the source. They reduce fire spread and protect lives and property with efficient water discharge. Custom-designed using hydraulic calculations for accurate coverage. Perfect for offices, malls, residential complexes, and industrial units. Reliable, compliant, and life-saving by design.

Gas Suppression Systems

Our gas suppression systems offer fast, residue-free fire control without using water. Ideal for sensitive spaces like data centers, server rooms, and control panels. We provide FM200, Novec 1230, and CO₂-based systems tailored to your needs. Quick-acting, safe for equipment, and environmentally friendly. Keeps downtime and damage to an absolute minimum.

Water Leak Detection Systems

Prevent costly damage with our real-time water leak detection systems. Smart sensors detect even the smallest leaks in critical zones. Instant alerts enable quick action before issues escalate. Ideal for BMS areas, data centers, and equipment rooms. Protects assets and infrastructure from unseen water threats.

Rodent Repellent Systems

Protect your critical systems from rodent-related damage with ultrasonic repellents. Chemical-free and maintenance-free, they emit high-frequency sound to deter pests. Safe for humans, continuous in operation, and easy to install. Ideal for control panels, cable ducts, server rooms, and factories. Cost-effective protection for cables and electrical infrastructure.

CCTV Surveillance

Monitor and protect your premises 24/7 with high-definition CCTV systems. From entry points to large industrial areas, we design coverage for all needs. Systems feature night vision, motion alerts, and remote access via mobile. Customizable for residential, commercial, and industrial setups. Your eyes, always on—no matter where you are.

Gas Detection Systems

Detect flammable, toxic, or hazardous gases with real-time accuracy. Ideal for chemical plants, industries, basements, and confined spaces. System triggers alarms and can integrate with ventilation or shutdown controls. Available in fixed or portable models with customizable settings. Protects people, processes, and environments from invisible threats.

Public Address Systems

Broadcast announcements, alerts, or emergency instructions with clarity. Zone-based or centralized control available for different facility types. Crystal-clear sound coverage even in large or noisy environments. Integrated with alarm and evacuation systems for full coordination. Perfect for schools, malls, industries, and commercial buildings.

VESDA Systems

VESDA (Very Early Smoke Detection Apparatus) systems detect smoke particles far earlier than traditional detectors. They continuously sample air to provide the earliest possible warning of fire. Perfect for data centers, telecom facilities, clean rooms, and archives. Reduces false alarms while ensuring maximum fire preparedness. Critical protection for mission-critical environments.

Why Choose Us

Experience & Certified Professionals

Comprehensive Fire & Security Solutions

24/7 Monitoring and Support

Compliance with National & International Standards

Tailored Solutions for Residential, Commercial and Industrial Clients

Strong Focus on Reliability, Safety and Customer Satisfaction
